

Crew training

Let us improve the skills of your crew

Technical information CM-921

It is important that your crew understands how to operate and maintain the MacGregor cranes installed on your ship. Effective crew training maximises a product's service life, reduces wear and improves its operating efficiency and safety.

We offer training courses at our training centre in Sweden, or at a location decided by you. All our training courses are adapted to your specific equipment.

Benefits

- Improved safety
- Skilled and motivated crew
- Preventative maintenance that extends equipment lifetime
- Continuous operation and reliability
- Quick trouble-shooting
- Increased profitability

Target groups

- Ship's crew
- Superintendents
- Office personnel

When

- New shipowner
- New crew
- New vessel
- At your request

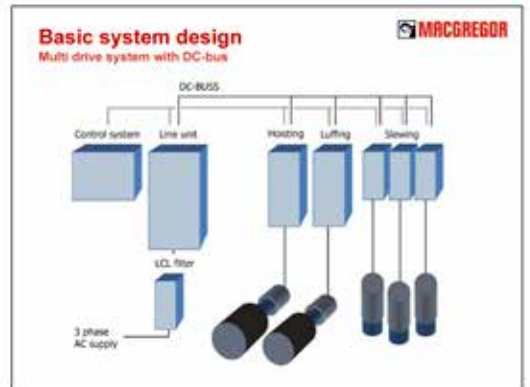

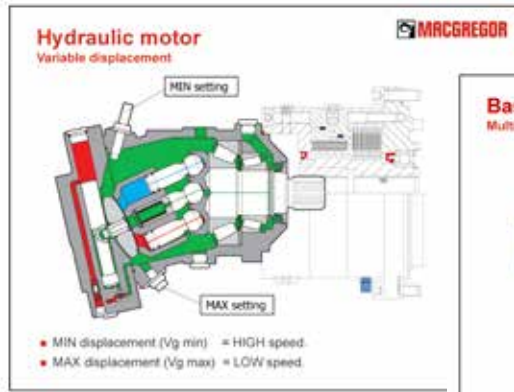

At your service

MACGREGOR

Designed to perform with the sea

General

- Training sessions normally consist of two full days of theoretical training
- Tailored training can be arranged at the crane training centre in Örnsköldsvik, Sweden
- Training programmes are always designed to meet your individual requirements

Theoretical training

- Hydraulic systems
- Electrical systems
- Mechanical systems
- Safety procedures
- Maintenance and spare parts
- Trouble-shooting
- Normal and emergency operation

Practical training

- Hands-on training with different crane control systems
- Trouble-shooting on control and electrical systems

Course material

- Training material is based on the equipment's instruction manual
- Presentations are provided on a USB memory stick in PDF format
- Paper copies of selected drawings and instructions are provided

Diploma

- All participants will receive a diploma after completing and passing the training course
