

Annual inspections

Annual and pre-docking inspections of PUSNES equipment

Offshore Mooring and Loading Competence Centre Sales Bulletin 0002.01

Background Information

We offer annual and pre-docking inspection of supplied equipment.

The inspections cover all parts of the system and possible failures or defects are identified. Inspections performed prior to drydocking will identify the need for repairs and replacements of defective parts of the system. This gives a clear scope of work that can be presented to yard so that they are prepared for the forthcoming drydock.

Customer benefits

- Potential downtime of system is eliminated
- Detailed inspection report is submitted
- A quotation for all necessary parts is given so that spares for drydocking are available
- Various technical alternatives and upgrades are informed
- Inspections can include tasks like calibration, upgrading and adjustments of system
- MacGregor's service organisation is class-certified

MacGregor shapes the offshore and marine industries by offering world-leading engineering solutions and services with a strong portfolio of MacGregor, Hatlapa, Porsgrunn, Pusnes and Triplex brands.
