

Porsgrunn steering gear real time logging

Steering gear logging, optimising and fault finding tool

Offshore Mooring and Loading Competence Centre Sales Bulletin 0009.01

Background Information

MacGregor has designed a special tool that can be installed on our delivered Porsgrunn steering gear.

The tool can be used to log all operations done by the steering gear over a period of time. This log can be used to identify any issues with the steering gear in preparation for dry-dock or planned maintenance.

Contact MacGregor for more details.

Details:

- Excellent tool to locate periodic failure
- Can log several details for long periods of time.
- Steering angle, hydraulic pressure, electric load, operating intervals and several others.
- Can contribute to fuel savings by optimising system.
- Complies with class requirements

MacGregor shapes the offshore and marine industries by offering world-leading engineering solutions and services with a strong portfolio of MacGregor, Hatlapa, Porsgrunn, Pusnes and Triplex brands.

MacGregor is part of Cargotec (Nasdaq Helsinki: CGCBV)
