

# MacGregor Electric Gantry Crane

A cost-effective, efficient, eco-friendly solution ideal for handling lift-away hatch covers

# Lifting and moving panels made simple

The MacGregor electric gantry crane is an energy-efficient, eco-friendly solution ideal for handling lift-away hatch covers. Lifting and moving panels could not be easier or simpler. With a well-designed, flexible cargo handling system, the operator only needs to lift and pile the required panels, delivering safe, efficient loading and unloading operations.

## **Environmentally-sustainable design**

MacGregor is a pioneer in eco-efficient product design. We introduce solutions that help our customers improve their competitiveness and also protect the environment. We continuously aim to set industry standards even higher.

The development of electric-drives is part of MacGregor's sustainable lifecycle culture; minimising environmental impact throughout the lifetime of our solutions. The MacGregor electric gantry crane eliminates the risk of oil spills and reduces energy consumption, only requiring power when the crane is in operation.

## Operation

- Weatherdeck hoist has a 22-tonne safe working load (SWL) capacity
- The gantry moves on a wheel/rail system
- The control stand is located on the starboard side
- Unobstructed view from the operational platform
- The electric-drive system ensures smooth, safe operations even in extremely cold conditions
- Hatch cover panels can be safely stacked on neighbouring panels
- Optional bulkhead and/or tweendeck panel operation with bulkhead hoisting gear

## Operating time

- Travelling speed of 24 m/min
- Lifting speed of 3 m/min
- One panel operation at a time

## Effective and efficient

- The crane is easily and conveniently operated from inside the enclosed cabin on the starboard side
- A well-designed cargo handling arrangement ensures that an operator only has to lift and pile the required panels, delivering efficient, flexible loading and unloading operations

## Environmentally-friendly

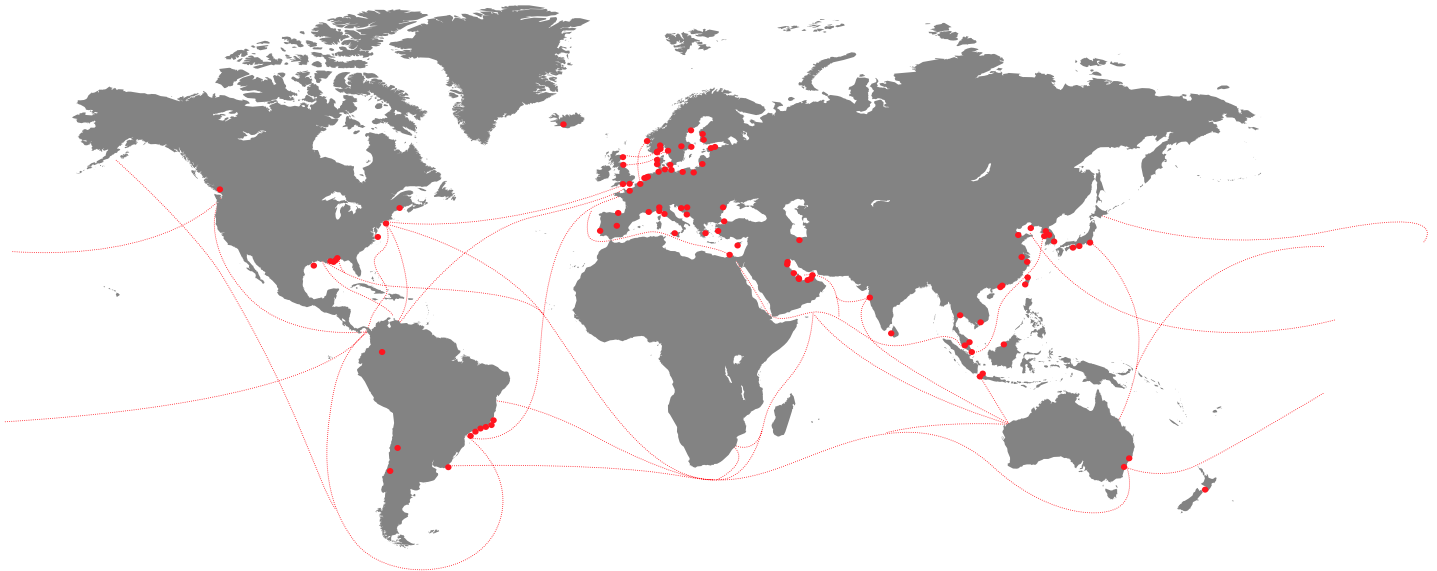

- Electric-drive operation reduces environmental impact throughout the lifecycle of the equipment

## Ordering

When you need a well-designed cargo system or for more information about MacGregor electric gantry cranes, please contact MacGregor at [drycargosales@macgregor.com](mailto:drycargosales@macgregor.com) or visit our website [macgregor.com](http://macgregor.com).

Wherever needed, you can rely on our support.  
We serve our brands globally:

- Ankerlökken Marine
- Allset
- ASCA
- Becker
- BMH
- Conver-OSR
- Grampian Hydraulics
- Flintstone
- Greer Marine
- Hamworthy
- Hatlapa
- Hydramarine
- Häggglunds
- Interschalt
- KGW
- KYB - ASCA
- KYB - Kayaba Industries / Navire Cargo Gear
- Luezhoe
- MacGregor
- MacGregor-Conver
- MacGregor-Häggglunds
- MacGregor-Kayaba
- MacGregor-Navire
- Navire Cargo Gear
- Nordströms
- Ozean Service & Reparatur
- Platform Crane Services (PCS)
- Plimsoll
- Pusnes
- Porsgrunn
- Rapp Marine
- Triplex
- Vestnorsk Hydraulikkservice (VNH)

MacGregor shapes the offshore and marine industries by offering world-leading engineering solutions and services with a strong portfolio of MacGregor, Hatlapa, Porsgrunn, Pusnes and Triplex brands. Shipbuilders, owners and operators are able to optimise the lifetime profitability, safety, reliability and environmental sustainability of their operations by working in close cooperation with MacGregor.

MacGregor solutions and services for handling marine cargoes, vessel operations, offshore loads, crude/LNG transfer and offshore mooring are all *designed to perform with the sea*.

*MacGregor is part of Cargotec (Nasdaq Helsinki: CGCBV).*
