MACGREGOR

MacGregor Replacement Modules for TTS LMG / TBH

The Challenge

Original IFM control modules are obsolete. Standard off-the-shelf market replacements do not work due to proprietary software configurations, leaving fleet operators exposed to downtime and high port costs.

The MacGregor Solution

As your key maritime partner, MacGregor provides the definitive, 100% fix, using our written installation guidance. Every replacement module is delivered fully pre-programmed to your exact crane IDs and your crew just need to follow the installation instruction. This universal solution is fully compatible with all TTS LMG and TBH cargo cranes.

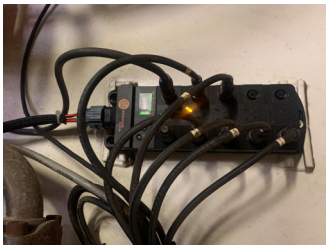

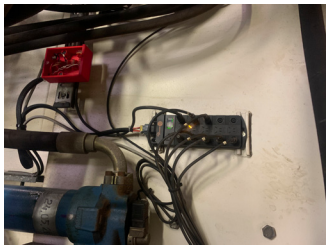

Field-Tested & Approved

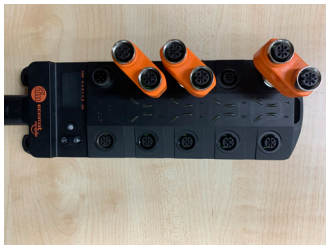

- Validation: Systematically tested during active crane operations using specialized emulation software.
- Overload Passed: Successfully validated under overload test, performing identically to original modules.
- Ready for Deployment: Officially approved for immediate delivery to fleets
- Complete Installation Kit: Supplied with a VDE-approved connection box and an engineered mounting adapter plate to solve tight onboard space constraints.

Contact MacGregor Today

Contact your dedicated MacGregor parts representative with your vessel details to secure your pre-programmed replacement modules.

Fleet Manager Tip

Because these units must be uniquely pre-programmed per crane to function, do not wait for a failure at sea. Secure a dedicated set of matched spares for your vessel's specific configurations today.

Module	Old part no	New part no	Product
PWM I module	5002256 / 10009232	400303008	CR2041 - ID02 - V-type crane
PWM I module	5002256 / 10009232	400303008	CR2041 - ID02 - Heavy Lift crane
PWM II module	5002198 / 10009211	400303006	CR2041 - ID05 - Heavy Lift crane
PWM I module	5002197 / 10009210	400302904	CR2041 - ID02 - Standard crane
Analog module	5002204 / 10009216	400353998	CR2042 - ID03 - V-type crane
Analog module	5002204 / 10009216	400268986	CR2042 - ID03
Digital module	5002203 / 10009215	400283148	CR2042 - ID01
