

At your service

MACGREGOR

Davit certification Annual/5 yearly

Enhancing the safety and reliability of your equipment

Approx time consumption

Davit annual inspection - 6 hours

Davit 5 yearly inspection/repair/load testing - 3 days

- Time excludes travel time
- 5 Yearly inspections require mandatory spares
- Load testing equipment on customer scope

Scope

With integrity and safety in focus, the main objective is to establish a uniform, safe and documented performance of periodic servicing and maintenance of launching appliances.

Spare parts

OEM spare parts are required for 5 yearly inspections as follows:

- Brake Repair Kit
- Wire rope
- Spidex Coupling
- Emergency Rope
- Hydraulic hoses(optional)
- Return Line filter element.
- Level Gauge
- Filler Breather

Crew assistance

The surveyor needs to be assigned competent personnel from the ship crew to operate the equipment and to assist during parts of the survey.

Davit

To be able to perform and complete a Davit inspection it is important that the Davit is fully operable, and that the vessel is not lying with the equipment on the key side. In case a mob boat is not present, test weight with an equivalent empty boat needs to be available.

MacGregor enables sustainable global maritime and offshore operations by maximising efficiency in cargo and load handling. With decades of experience, a global presence, and a strong portfolio of innovative technologies and services, MacGregor creates lifetime value to its customers.

MacGregor solutions are designed to perform with the sea, helping the customers enhance safety, reduce environmental impact, and optimise operational efficiency from newbuilding to upgrades and modernisations.
