Yacht equipment
and services

MacGregor Yacht Services

MacGregor operates 40 service centers in 30 countries, with the Yacht Services Centre of Excellence located in Bremerhaven, Germany. With many years of experience in the design, manufacturing, supply, and servicing of specialist yacht equipment, we offer tailor-made solutions including modernizations, upgrades, conversions, and retrofits of:

- Tender doors
- Jet ski gate; boat gate; toy store gates
- Passerelles and gangways
- Telescopic masts
- Stern platforms and bathing platforms
- Sea balcony and bulwarks
- Helicopter deck
- Underwater windows and underwater observatories
- Anchor shell cover
- Lighting

We also specialize in stainless steel and aluminum fabrication, as well as mechanical, hydraulic, and electrical installations, modifications, and upgrades. Our highly exclusive solutions are tailored to meet the unique needs of each vessel, ensuring safe and efficient operation with the support of specialist services.

MacGregor yacht equipment meets the rigorous demands of modern yacht operations, combining technical sophistication with elegance and reliability. Backed by a strong global organization, we deliver custom-made solutions and provide reliable service throughout the equipment's lifetime.

Additionally, MacGregor Bremerhaven offers services not only for MacGregor equipment but also for equipment from other manufacturers and suppliers.

Yacht services at a glance

Modern yachts feature highly technical and sophisticated systems. MacGregor provides the specialized services required to maintain safety and performance. Our engineers are available worldwide to service customer requirements.

Genuine spare parts

We offer a reliable and efficient spare parts service whWe offer a reliable spare parts service that is fully operational at all times. As part of a global organization, our sourcing power ensures the worldwide availability of genuine spare parts. With our in-house mechanical, hydraulic, and electrical workshops, we can manufacture custom, high-quality parts on short notice, ensuring fast delivery.

Repairs and Maintenance

Our service engineers are on call for both planned maintenance and unforeseen repairs. As experts in yacht equipment, we guarantee fast, effective solutions tailored to your needs. Our services include:

- On-demand repairs
- Planned maintenance
- Inspections and certifications
- Service contracts
- Rapid response, including in-voyage repairs

Retrofit services

MacGregor provides comprehensive modernization services, including initial studies, technical solutions, design, manufacturing, and installation. We advise on various aspects of vessel modernization and commit to completing projects in the shortest time possible.

Inspections and Certifications

Regular inspections help minimize the risk of breakdowns and keep you informed about the condition of your equipment. We offer detailed inspections and surveys to ensure operational safety and efficiency.

Design and tailor made solutions

We have extensive experience in developing bespoke design and installation solutions for our customers. We understand that you may have unique ideas requiring sophisticated, tailor-made solutions to enhance your vessel's presentation and performance.

Rapid response and customer support

Our service personnel are available 24/7, allowing us to dispatch a service engineer to you as quickly as possible.

PLC and Visualisation

We offer highly specialized, innovative solutions using Programmable Logic Controller (PLC) systems to control the entire network or selected equipment on your vessel. For example, PLC systems can be used to control doors or lighting on board through a custom-made app on your smartphone, iPad, or tablet.

Rubber profiles

Our molding facility produces custom rubber corners and profiles based on customer specifications. Due to the quantities processed, we can offer a wide range of sealing profiles for sea-going vessel equipment.

Steel

We design, manufacture, and install steel, stainless steel, and aluminum structures according to customer specifications. Each stage—planning, design, manufacturing, installation, maintenance, and repair—is carefully tailored to meet your exact requirements.

MacGregor enables sustainable global maritime and offshore operations by maximising efficiency in cargo and load handling. With decades of experience, a global presence, and a strong portfolio of innovative technologies and services, MacGregor creates lifetime value to its customers.

MacGregor solutions are designed to perform with the sea, helping the customers enhance safety, reduce environmental impact, and optimise operational efficiency from newbuilding to upgrades and modernisations.
