

Central System Hydraulic (CSH)

## Hydraulic power pack

TTS hydraulic power packs are supplied in connection with the CSH winch system. The power packs feed the winches with the desired measure of hydraulic oil.

**TTS**

The hydraulic power pack feeding the anchor winches is supplied with all relevant certification from the specified classification society. The approval process includes a final shop test before the equipment leaves the TTS production facility.

#### System advantages

- Compact design ensuring minimum space required below deck
- Automatic 'running hours' control of electric motors and hydraulic pumps
- Water cooling or optional air cooling of system
- Vibration dampers prevent interference from ship vibration during sailing.
